ABOUT US

AFOSI is a lean, technology backed local non-governmental organization addressing challenges across health, education, livelihoods, leadership and governance, Climate justice and humanitarian support. Our current flagship initiatives; Sheria ya Vijana, M.A.T.H, Youth Voices Lab and the YOMA Projects are implemented through our digital tools, including the Kiongozi Platform, the Kenya Youth Climate Hub (KYCH) and the Flare Hub startup management platform.

Cross cutting themes: **Advocacy, gender equality and technology and innovation**

Founded in 2013, AFOSI uses the human centred design and a right based approach in programming. AFOSI's theory of change is that socio-economic development happens when communities have the requisite skills, knowledge, education, ability to labour and good health that enable them to pursue different livelihood strategies and achieve their livelihood objectives.

OUR VISION

A sustainable world!

OUR MISSION

To promote actions that are geared towards harnessing and protecting the full potential of young people and women to realize the sustainable development goals

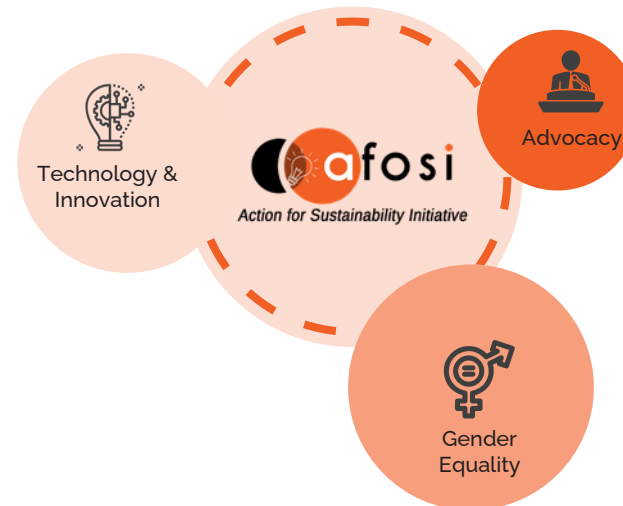

OUR VALUES

Teamwork
Innovation
Integrity
Professionalism

Cross cutting themes

WE WORK WITH 7:

OUR PILLARS

HEALTH

At AFOSI, we work with communities, young people and women in the informal settlements in partnership with county and national government to promote mental health among PWDs and PLHIVs as well as access to sexual reproductive health rights and services amongst the rights holders.

EDUCATION

We advocate for Education for Sustainable Development (ESD) through the M.A.T.H project, coding and robotics for students, mentorship, digital literacy and linkages with partners. Our approach combines advocacy with academic and career guidance, equipping students with confidence and the skills to make informed decisions about their future.

ENVIRONMENT

AFOSI drives sustainable waste management through innovative technologies that reduce environmental impact, advance climate action, and transform waste into economic opportunities for communities across Kenya.

HUMANITARIAN SUPPORT

AFOSI, recognize disasters as both cause and effect of poverty and injustice and therefore humanitarian efforts are an intrinsic part of our overall program approaches. We strategically respond to emergencies in four sectors of livelihoods. Sexual and reproductive health (SRH) and education. From natural disasters to armed conflicts, Afosi provides humanitarian assistance to people in need, Afosi focuses the nexus of relief, recovery, development and preparedness, in which strengthening communities' resilience is our primary goal

LIVELIHOODS

AFOSI supports communities to achieve sustainable livelihoods by empowering youth and women to build competitive enterprises. Our programs boost agricultural production, promote local markets, and enhance access to food, income, and essential services.

LEADERSHIP AND GOVERNANCE

At AFOSI, we build leadership capacity through the implementation of the Sheria Ya Vijana project where we Empower, Engage and Connect the youth to lead and participate meaningfully in the country's green and digital transitions. Through the Kiongozi Platform we empower Kenyan youth by building green and digital economy skills, promoting inclusive participation, providing verified information and leveraging AI to inspire informed action.
